

# Re-Inspection

A Re-Inspection is available when a specific system or structure has been inspected, found deficient, and someone has made the repair, and you would like to verify that the work has been completed properly as requested and stated by the vendor. Also, any follow-up to the Home Inspection, due to systems being turned off or other issues that caused a system or part of the property to not be inspected, and require the inspector to return to the property to complete the full inspection is considered a Re-Inspection, and there is a routine return charge for this service. A Re-Inspection generally is an additional fee of \$100.
